SUMMARY

Skilled Backend Web Developer with experience in crafting efficient and reliable web applications. Strengths lie in coding, debugging, and providing backend support to ensure seamless user experience. Demonstrated ability in integrating databases and developing server-side logic that improves website functionality and speed. Have made significant contributions to improving web application responsiveness and efficiency at previous workplaces.

EDUCATION

(2021 - 2024)

**KVN NAIK ARTS, COMMERCE AND
SCIENCE COLLEGE - NASHIK**

CGPA - 8.59

(2019 - 2021)

**DD BYTCO JR COLLEGE -
NASHIK**

Percentage - 75.83%

WORK EXPERIENCE

MARVEL TECHNOLOGIES PRIVATE LIMITED - WEB DEVELOPER

1 YR 9 MONTHS

- Developed dynamic and responsive web applications using PHP and MySQL across multiple projects.
- Seamlessly integrated third-party APIs to enhance the functionality and user experience of existing applications.
- Designed, built, and maintained webpages using HTML, CSS, JavaScript, and PHP ensuring cross-browser compatibility and responsiveness.
- Structured and optimized MySQL databases to support various application needs and ensure efficient data management.
- Leveraged PHP frameworks such as CodeIgniter to improve application scalability, performance, and maintainability.
- Diagnosed and resolved complex technical issues in PHP-based projects, ensuring minimal downtime and smooth functionality.

MAIN FLOW SERVICES AND TECHNOLOGIES PVT. LTD. - WEB DEV (INTERN)

2 MONTHS

- Completed web development tasks using HTML, CSS, and JavaScript.
- Created 4+ Task / Projects.

SKILLS

- Languages:** C, C++, Java, Python
- Web Technologies:** HTML, CSS, JavaScript, PHP (CodeIgniter 3).
- Databases:** MySQL, PostgreSQL
- Operating Systems:** Windows, Linux
- Core Concepts:** Object-Oriented Programming (OOP), Responsive Design, Single Page Web Applications (SPA), RESTful API Architecture
- Version Control:** Git, GitHub.

LANGUAGES

Hindi
English
Marathi

CERTIFICATIONS

- Web Development:** Javascript and Php Course, Responsive Web Design
- Other:** Basics Of React, Prompt Engineering.

COMPANIES PROJECT

OPX: 21 MONTHS

OPX is a comprehensive solution designed to manage all operations of a cloud kitchen team efficiently. It encompasses key functionalities such as attendance tracking, HRM management, leave and week-off management, roster creation, store management, and equipment management. Once a user checks in, the system initiates location tracking to monitor whether the user is inside or outside the store, ensuring operational transparency and efficiency. OPX streamlines workflows, enhances team coordination, and optimizes resource management for seamless cloud kitchen operations.

XPRESS CARS – 4 MONTHS

Designed and developed a system to manage car records, enabling users to add, update, delete, and view details such as ownership, registration, and service history.

AICA – 6 MONTHS

A robust vehicle lifecycle management platform engineered to digitize and centralize automotive records. Core capabilities include full CRUD operations on vehicle profiles, structured ownership chain management (tracking transfers between individuals or organizations), registration metadata management (dates, jurisdiction, expiry), and a chronological service history module capturing maintenance events, repairs, and inspections. Designed with data integrity as a priority, the system ensures every vehicle's complete history is queryable, auditable, and maintainable by authorized users.

TECHNICAL SKILLS & CONTINUOUS LEARNING

Proficient in HTML, CSS, JavaScript, PHP, MySQL, and PostgreSQL, with hands-on development experience across both Windows and Linux environments. Completed certified courses in React.js and web development fundamentals, continuously expanding technical knowledge to deliver intuitive, efficient, and scalable digital solutions.

- Currently exploring cloud computing through AWS and Google Cloud platforms — provisioning environments, configuring storage solutions, and experimenting with service deployment to build practical, real-world cloud infrastructure skills.
